

## READ ME

Dear COBALT8M owner,

This new V2 bank for the COBALT8 series was designed on a COBALT8X model. However, the presets were also given octave offsets to help owners of the 37 key versions.

**If you are using your COBALT8M with a 61-key controller (or larger) please ensure the octave offset setting in your MODALapp COBALT8M menu is turned OFF.**

**If your midi keyboard controller is 37 keys or less, try running this setting ON, and presets will load in at designated octave offsets that were designed for the 37 key version, which may end up being ideal, depending on your chosen midi keyboard.**

Thanks!

The Team of Modal Electronics
